

PROTECTION OF HISTORICAL HERITAGE

OBJECTIVE

To enhance sustainable conservation and historic places.

DESCRIPTION

The preservation of the historical context takes place through the establishment of commercial activities related to crafts, agri-food and culture; the identification of outdoor spaces, parks, gardens, squares and open spaces of historical and environmental interest; the definition of regulations for the design of an integrated system of spaces that includes historic sites, areas of recent construction and the system of historical-environmental assets, with particular attention to the interventions relating to urban furnishings.

EXPECTED RESULTS

Research activities on protection, improvement and maintenance of heritage buildings, monuments and sites with historical value. Support for professions with low environmental impact and high cultural value.
