

## INFORMATION DURING THE EMERGENCY

### OBJECTIVE

Rapidity of intervention and clarity of information.

### DESCRIPTION

Information and divulgation to the population is the first and most important aim to reach for a good mitigation and adaptation policy of risks. During an emergency, the message must be clear, direct and understandable by every member of the community.

### EXPECTED RESULTS

Ability to face many environmental disasters thanks to civil protection and raised awareness of the population.

### RESULT INDICATORS

Number of people reached.

### INVOLVED ACTORS

Civil Protection, Governments, Public Administrations, civil society organization.

### EXPECTED TIMELINE FOR ACTION

- Short term (1-4 years)

### BEST PRACTICES

- Italy
- Veneto Region - Italy
- Germany

### CRITICALITIES

Bad management of emergency information and bad population response to disasters.

### SCOPE OF THE ACTION

- Adaptation

### TYPE OF PROPOSED ACTIONS

- Soft

## SECTOR OF ACTION

- Public health
- Transport and infrastructure
- Other

## CLIMATE IMPACTS

- Coastal erosion
- Drought
- Extreme precipitation
- Extreme temperatures
- Fires
- Floods
- Strong winds
- Other

## IMPLEMENTATION SCALE

- Association of municipalities
- Region / Country
