

## MANAGING AND ACCEPTING COASTAL CHANGES ON FARMLAND

### OBJECTIVE

Preserve the environment.

### DESCRIPTION

Farm owners can investigate the potential changes and the opportunities of agreeing on a common management of the local environment with an environmental agency and other stakeholders. Protection of habitats and coastal management are important focuses.

Owners can redevelop barns as tourist accommodation and realign development plans, with new opportunities for existing activities.

### EXPECTED RESULTS

Improved existing tourism activities.

### RESULT INDICATORS

Number of integrated coastal management plans.

### INVOLVED ACTORS

Farm owners, environment agencies, government, private sectors.

### EXPECTED TIMELINE FOR ACTION

- Short term (1-4 years)

### BEST PRACTICES

- UK
- Midden-Delfland - Netherlands

### CRITICALITIES

Difficulty of negotiation for a new planning system and economic availability.

### SCOPE OF THE ACTION

- Adaptation

### TYPE OF PROPOSED ACTIONS

- Grey

- Green
- Soft

## SECTOR OF ACTION

- Agriculture / Forests / Land use
- Biodiversity / Conservation of ecosystems
- Coastal management
- Tourism and leisure
- Other

## CLIMATE IMPACTS

- Change or loss of biodiversity
- Coastal erosion
- Floods

## IMPLEMENTATION SCALE

- Province
- Region / Country
- Other
